Questionnaire desk

Review security questionnaires with the evidence in front of you.

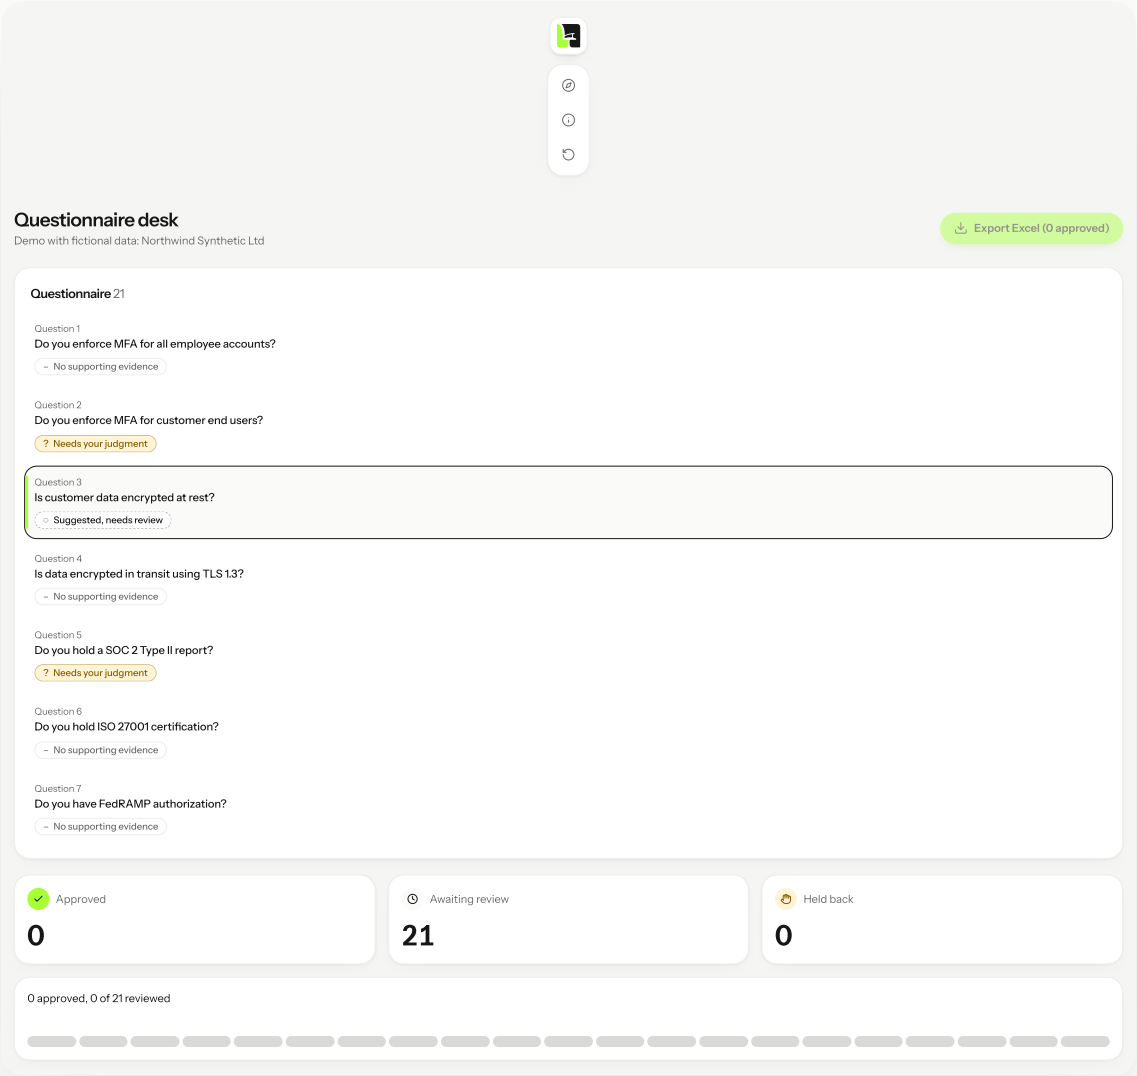

A short, step-by-step guide to the Questionnaire desk demo. You open a sample questionnaire, check each suggested answer against a policy, approve the ones that are right, and download a finished Excel file.

- Suggested answers
- Cited evidence
- You approve
- Excel export

Open Questionnaire desk

https://questionnaire-desk.vercel.app/ · Version 0.1.0 · Checked 2026-10-15

Demo with fictional data. Keyword matching, not AI. Nobody but you reviews the answers.

The shortest path

Page 3 (Start here) → page 5 (Your first review) → page 16 (Download the Excel file). That is about four minutes.

Start here

Questionnaire desk is a demo of a simple idea: software suggests an answer, and **you** decide. Nothing goes into the Excel file until you approve it.

1

Open the link

Use any current web browser on a computer or phone. There is nothing to install and no account to make.

Open Questionnaire desk

https://questionnaire-desk.vercel.app/

2

Review the answers

A sample questionnaire with 21 questions loads for you. The software suggests an answer where a fictional company policy supports one.

3

Download the result

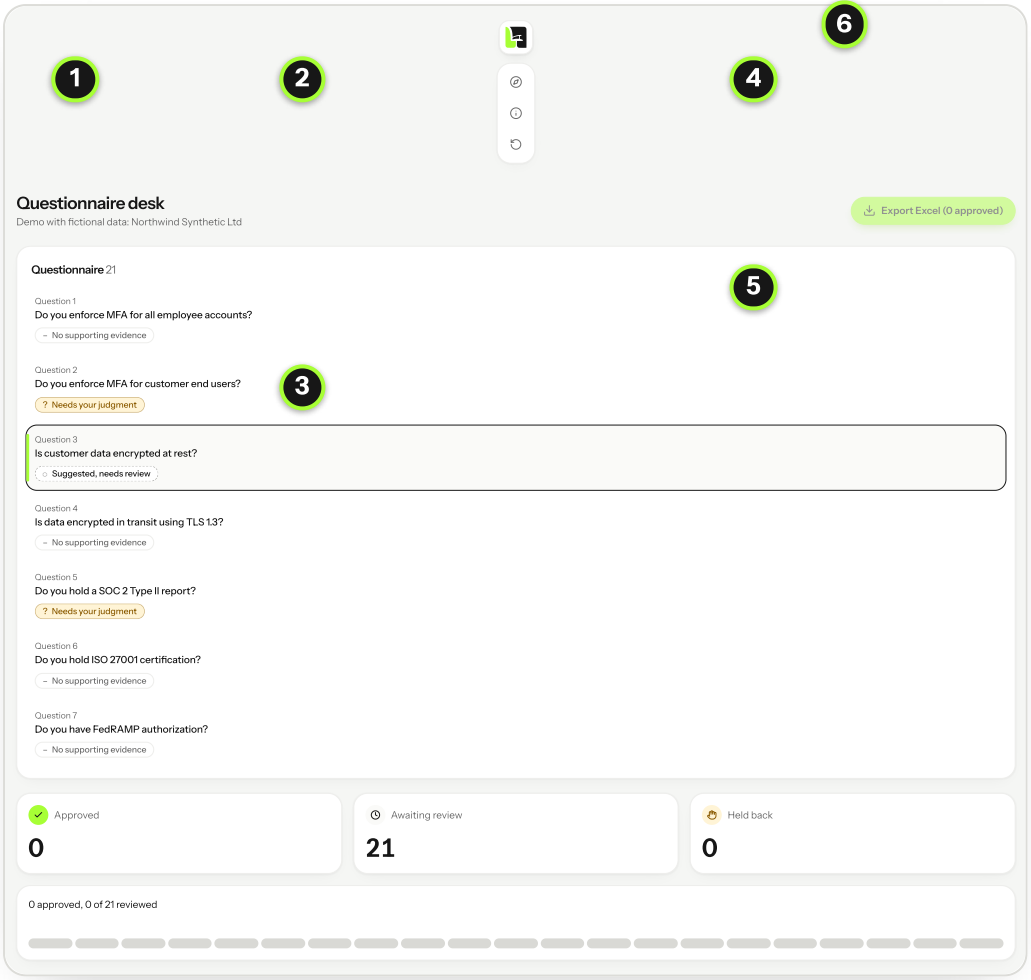

Only answers you approved are written into a copy of the Excel file. Everything else stays blank.

Good to know before you start

All names, policies and answers are fictional. The matching is simple keyword matching, not artificial intelligence, so many questions will have no suggestion. That is on purpose. Nothing you do is sent anywhere or saved on a server. Please do not use real company files.

The screen at a glance

This is the main screen once you press “Start the interactive demo”. The numbers match the list on the right.

1. **Questions**
   All 21 questions. Click one to open it.

2. **Progress**
   How many answers you approved, still have to check, or held back.

3. **The suggestion**
   What the software proposes. A dashed edge means nobody has approved it yet.

4. **Evidence**
   The exact policy sentence behind the suggestion.

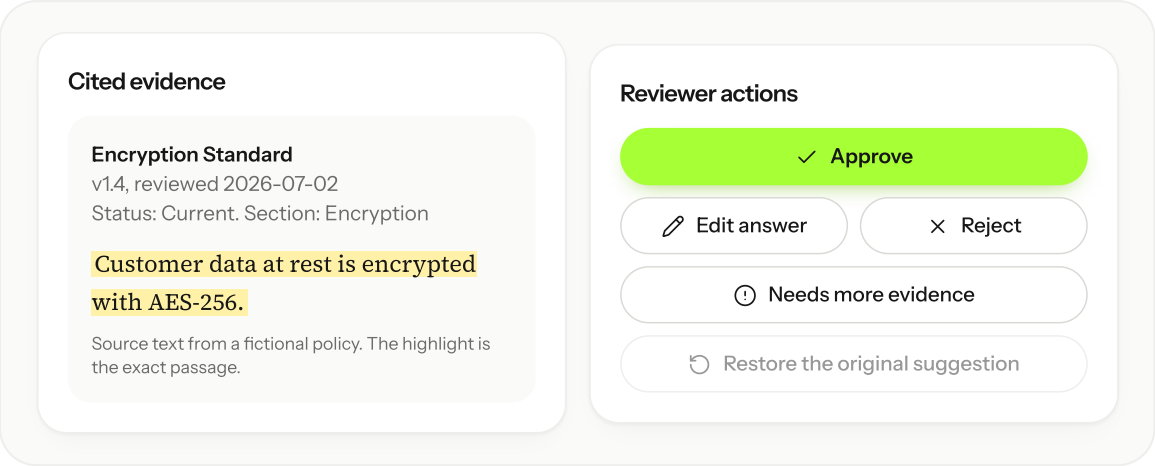

5. **Your buttons**
   Approve, edit, reject, or ask for more evidence.

6. **Download**
   Writes your approved answers into the Excel file.

Your first review in 4 steps

Where The live demo.

What it is for Approve two answers and download an Excel file that contains only those two. About four minutes, no cost.

Left: the evidence for Question 3. Right: the Approve button you will press.

What you should end up with

The button at the top right reads “Export Excel (2 approved)”. The file you download has an answer next to exactly those two questions, and the rest is blank.

1. Press **Start the interactive demo**, then click **Question 3** in the list.
2. Read the highlighted sentence on the right. It says customer data at rest is encrypted. Press **Approve**.
3. Click **Question 9** (“Do you test restores from backups?”), read its sentence, press **Approve**.
4. Press **Export Excel (2 approved)** at the top right and open the file.

> Common mistake: approving without reading the sentence. The software can be wrong; you are the check.

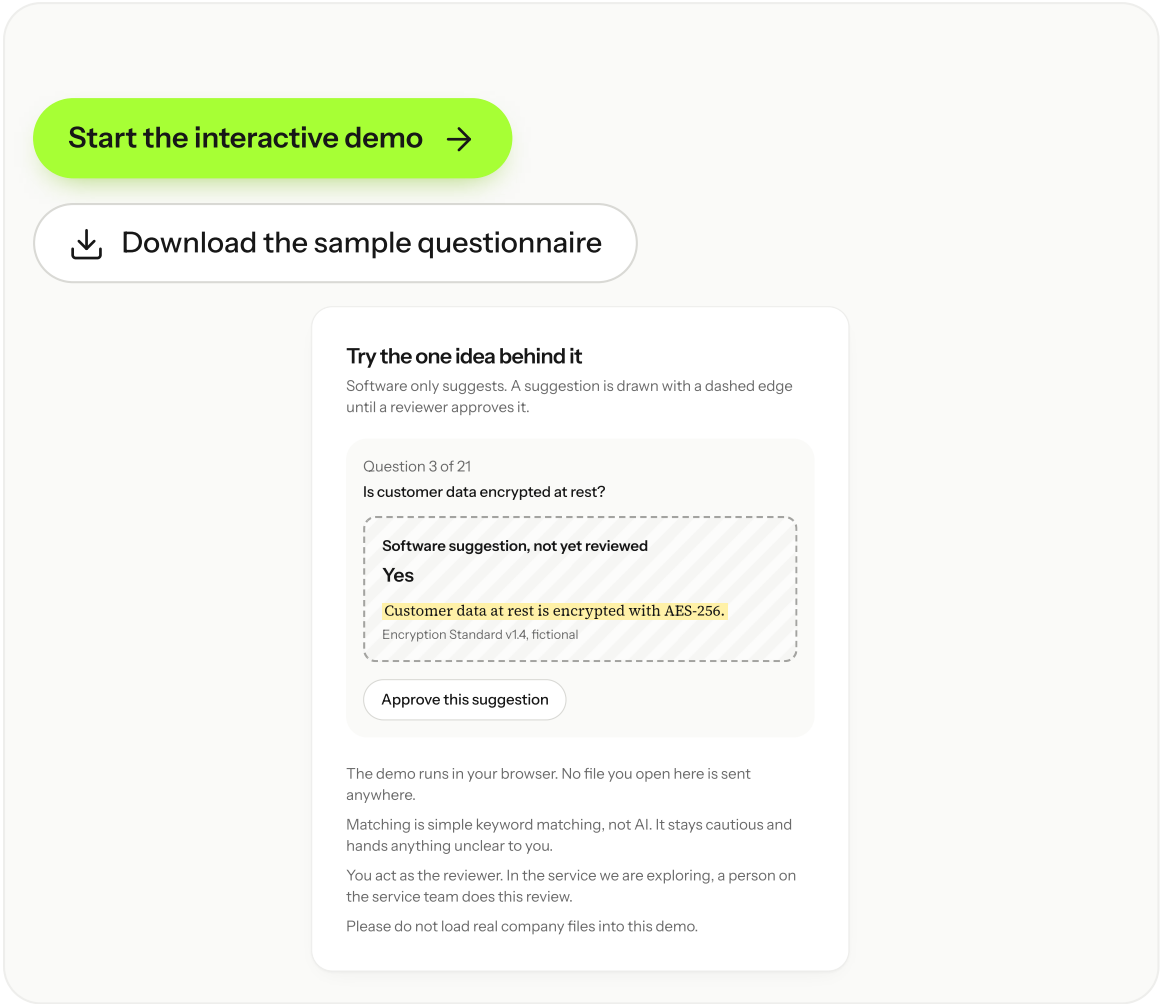

Open Questionnaire desk

https://questionnaire-desk.vercel.app/

Start from the welcome screen

Where The first page when you open the link.

What it is for Explains the idea and lets you try an approval before you open the questionnaire.

Top: the two buttons. Below: a small practice example. It is not part of your questionnaire.

1. Press **Approve this suggestion** in the practice card. The dashed box becomes a solid, green-edged box.
2. Press **Undo approval** to go back. Nothing here is saved.
3. Press **Start the interactive demo** to open the real questionnaire, or **Download the sample questionnaire** to get the Excel file.

What you should see

A practice card with a dashed box that says “Software suggestion, not yet reviewed”.

> Cost: none. The sample file comes from the same site; nothing is uploaded.

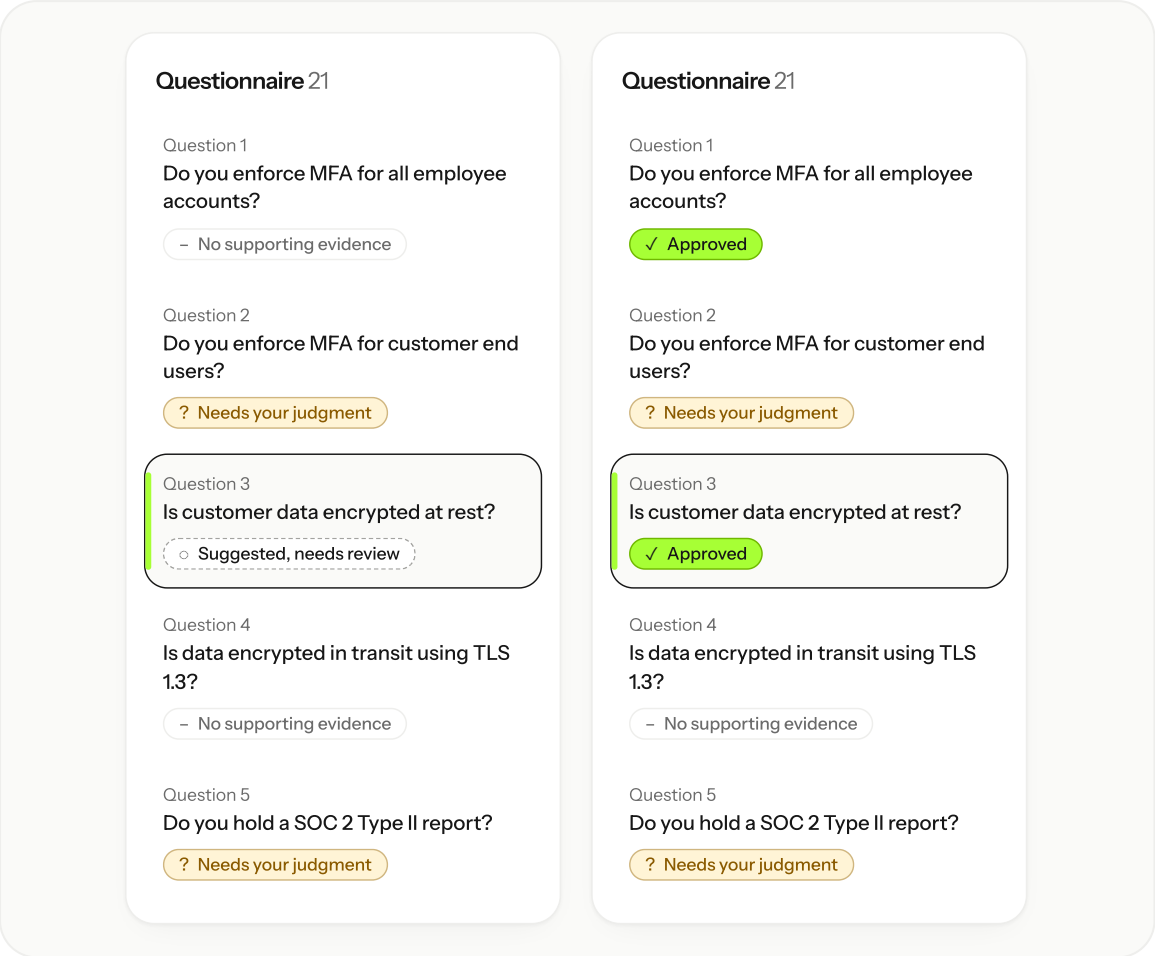

Open Questionnaire desk

https://questionnaire-desk.vercel.app/

Pick a question from the list

Where Left column, titled “Questionnaire”.

What it is for Shows every question with a status, so you can see what still needs you.

Left: before you review. Right: after approving Questions 1 and 3. The selected row has a dark outline.

1. Click any question. You can also use the Up and Down arrow keys, Home and End.
2. Read the status label under it. “Suggested, needs review” means the software drafted an answer. “Needs your judgment” and “No supporting evidence” mean it drafted nothing.
3. Work through the questions in any order.

What you should see

The row you click is outlined, and the middle and right columns show that question.

> In this sample, 5 questions get a suggestion, 2 need your judgment and 14 have none.

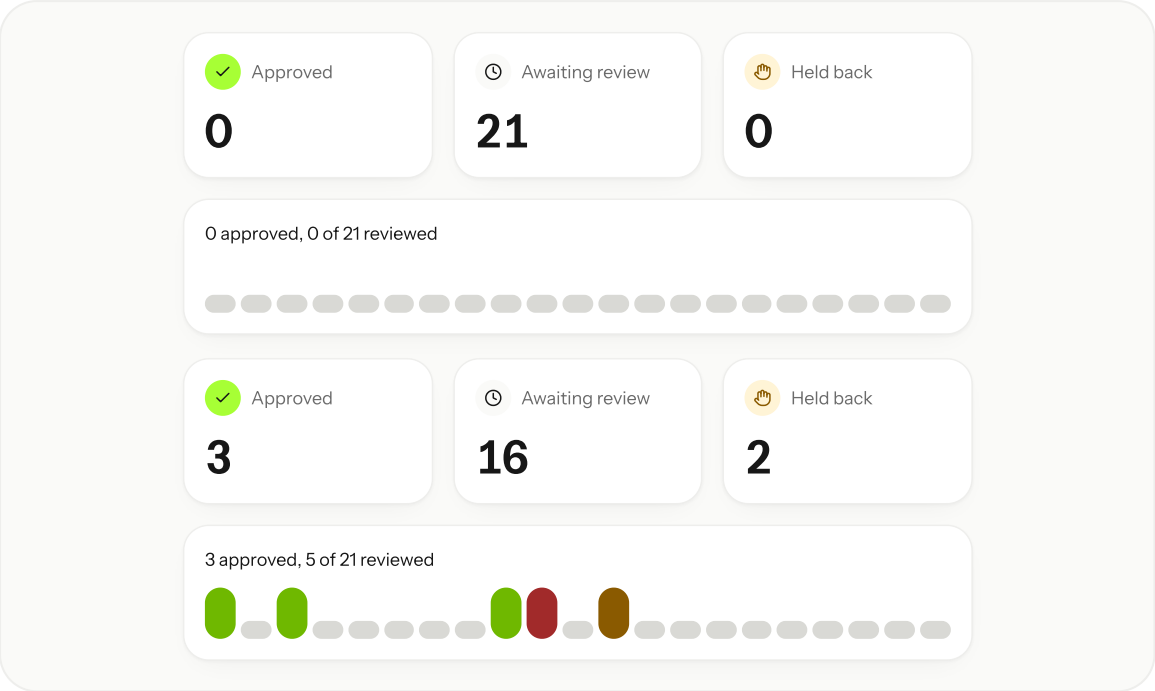

Open Questionnaire desk

https://questionnaire-desk.vercel.app/

Follow your progress

Where Top of the middle column.

What it is for Counts what you approved, what is still waiting, and what you held back.

Top: at the start. Bottom: after approving three, rejecting one and holding one.

What you should see

Approved goes up when you approve. Held back counts rejected answers and “needs more evidence” answers.

1. Approve, reject or hold a question (the next pages show how).
2. Watch the three numbers change.
3. The row of small bars is a map of all 21 questions: green is approved, red is rejected, amber is held back, grey is untouched.

> These numbers are for this session only. They are not customer data.

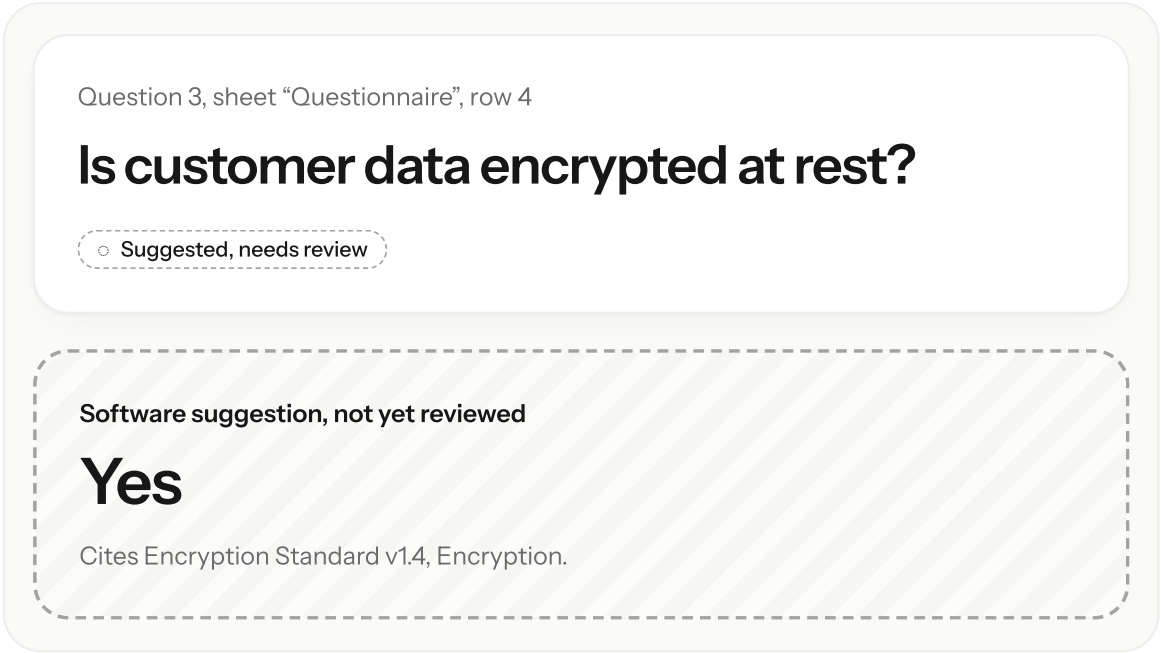

Open Questionnaire desk

https://questionnaire-desk.vercel.app/

Read a suggested answer

Where Middle column, the big box under the question.

What it is for Shows what the software proposes, and that nobody has approved it yet.

Question 3. The dashed, striped edge means “suggestion, not approved”.

What you should see

An answer such as “Yes”, the title “Software suggestion, not yet reviewed”, and a line naming the policy it comes from.

1. Click **Question 3**, “Is customer data encrypted at rest?”.
2. Read the answer and the line that names the policy it cites.
3. Do not treat it as final. The next pages show how to check it.

> The software only matches keywords. It is not AI and has not been checked by an expert.

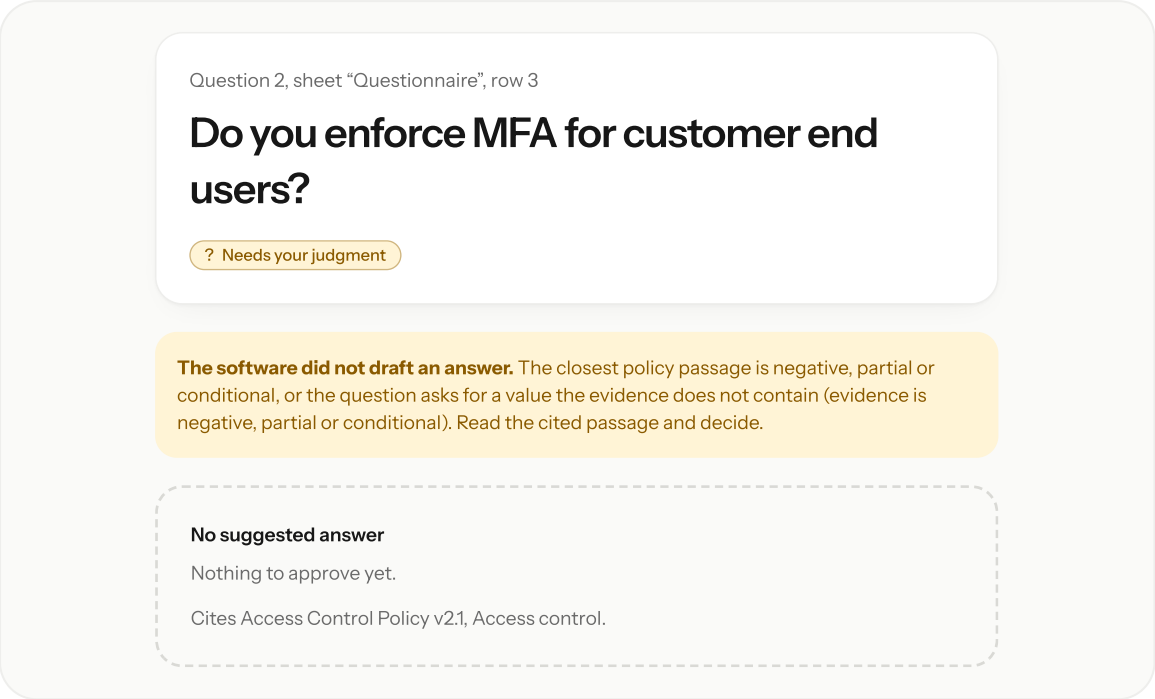

Open Questionnaire desk

https://questionnaire-desk.vercel.app/

When the software drafts nothing

Where Middle column, above the answer box.

What it is for Explains why a question has no suggestion, so a gap is never filled with a guess.

Question 2: the closest policy sentence is negative or conditional, so nothing is drafted. Question 1 looks the same, but its note says no supporting evidence was found.

What you should see

The answer box says “No suggested answer”, and the Approve button is greyed out.

1. Click **Question 1** or **Question 2**.
2. Read the note. It tells you whether the software found a doubtful sentence or nothing at all.
3. If a policy does cover the question, write the answer yourself (see “Write your own answer”).

> On purpose: the demo prefers a blank to a guess.

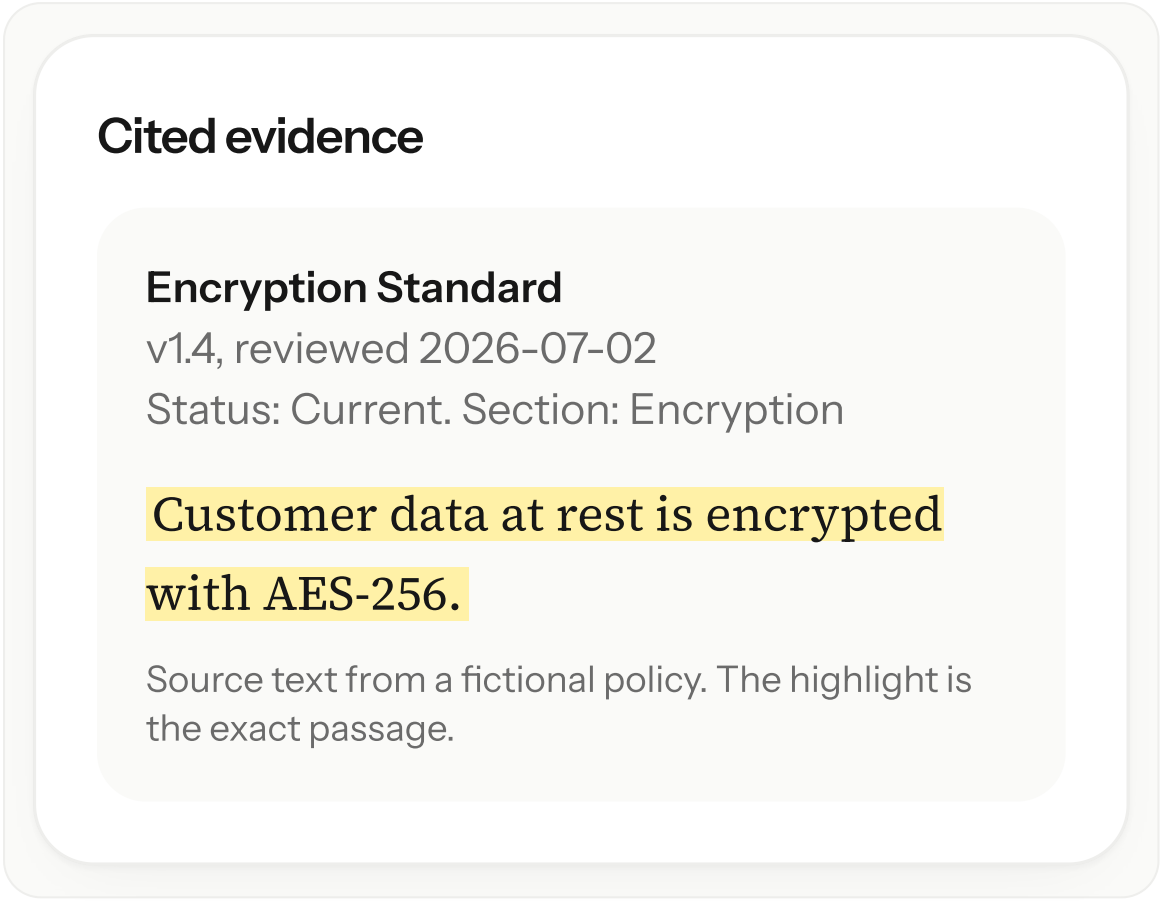

Open Questionnaire desk

https://questionnaire-desk.vercel.app/

Check the evidence

Where Right column, “Cited evidence”.

What it is for Shows the exact policy sentence behind a suggestion, with the document, version and date.

The yellow highlight is the exact source sentence. It is set in a different typeface so it looks like quoted text.

1. Click a question that has a suggestion, such as **Question 3**.
2. Compare the highlighted sentence with the question. Check the version and the “Status” line.
3. If the sentence does not really answer the question, do not approve it.

What you should see

A card with the policy name (Encryption Standard v1.4), its status, and the highlighted sentence.

> All six policies are fictional.

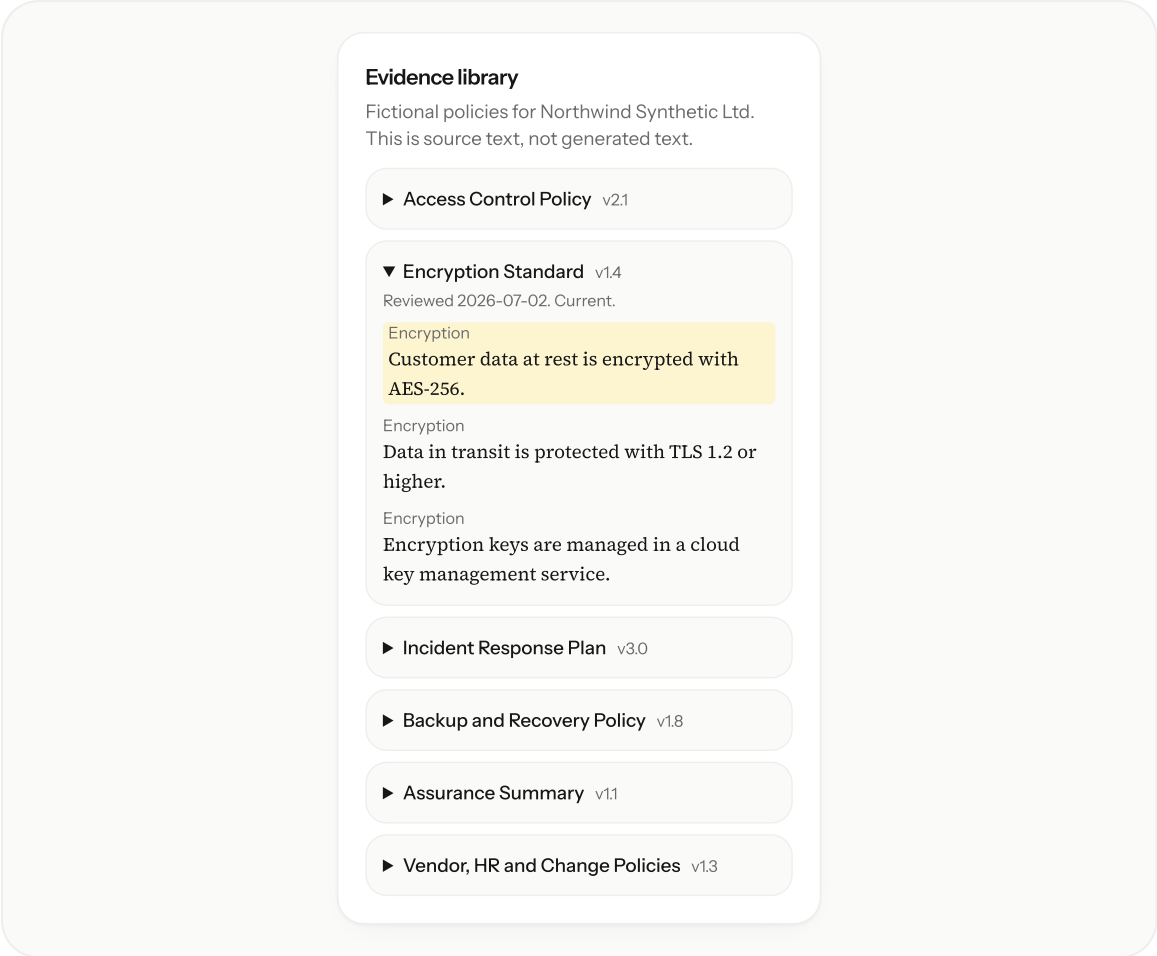

Open Questionnaire desk

https://questionnaire-desk.vercel.app/

Browse the policy library

Where Right column, “Evidence library”.

What it is for Lists all six fictional policies so you can find support the software missed.

The Encryption Standard is open because Question 3 cites it. The cited sentence is highlighted.

1. Click a policy name to open it.
2. Read its passages. They are fixed text and cannot be edited.
3. Found the support for a question the software missed? Use it in “Write your own answer”.

What you should see

Each policy opens to show its version, review date and its passages.

> The library has 6 policies and 18 passages, built into the demo.

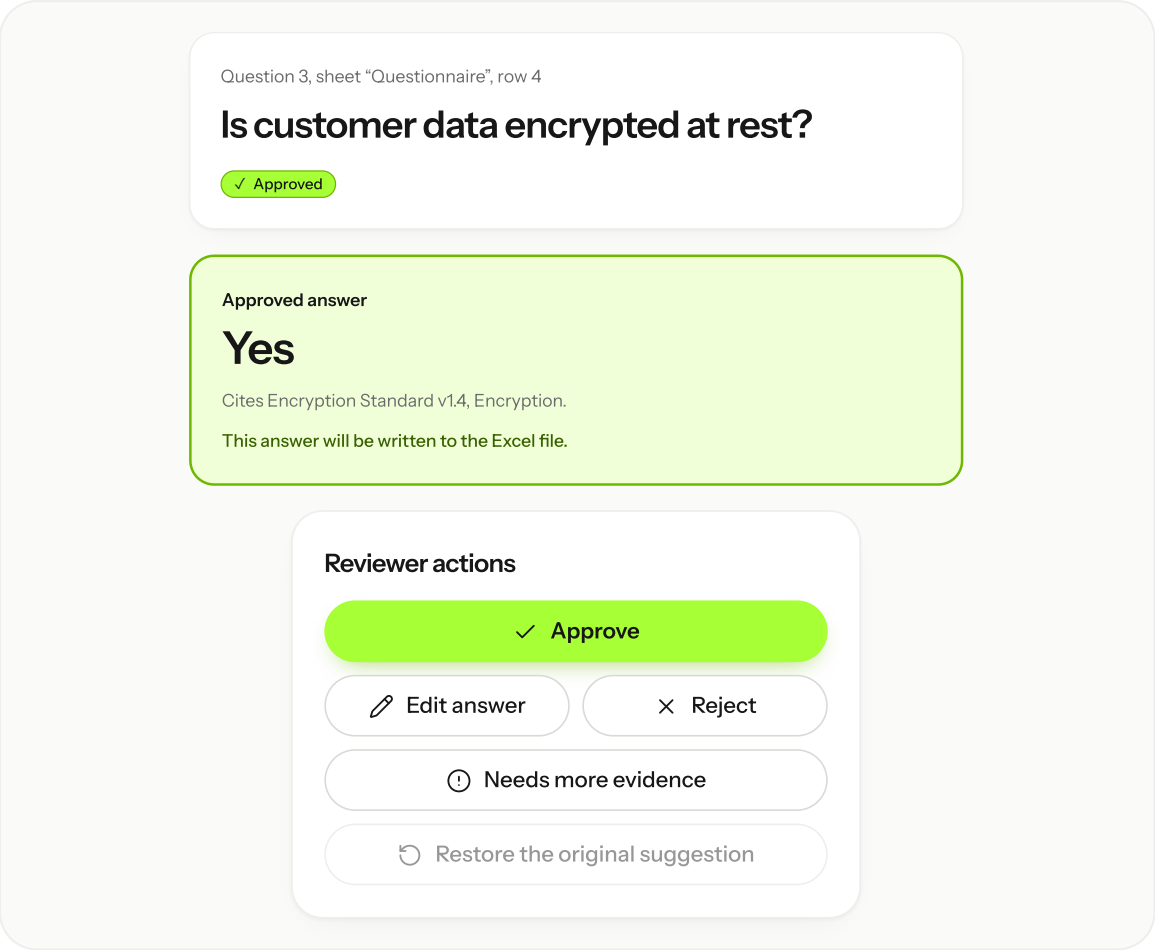

Open Questionnaire desk

https://questionnaire-desk.vercel.app/

Approve an answer

Where Right column, “Reviewer actions”.

What it is for Records that you checked the answer and its evidence. Only approved answers are downloaded.

Top: Question 3 after approving. Solid green edge, and a note that it will be written to the Excel file.
Bottom: the buttons.

1. Click **Question 3** and check its evidence.
2. Press **Approve**. It is greyed out if there is no answer yet.
3. Changed your mind? Press **Restore the original suggestion** to undo all your changes to this question.

What you should see

The box title changes to “Approved answer”, and the Export button counts it.

> Approving is your decision. The demo does not claim any expert reviewed the answer.

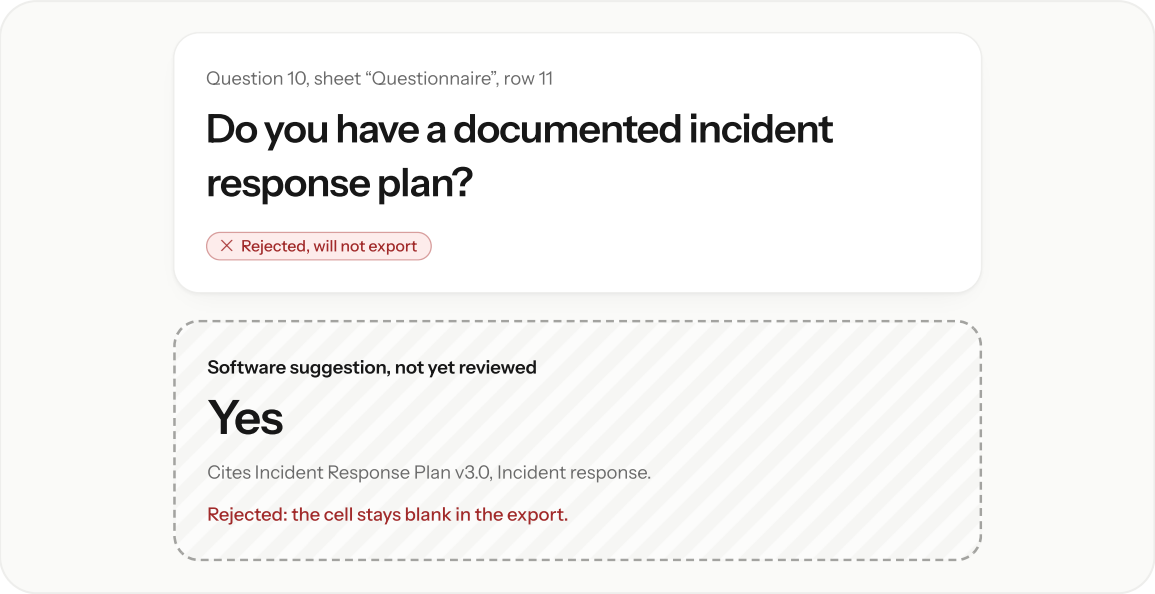

Open Questionnaire desk

https://questionnaire-desk.vercel.app/

Reject, or ask for more evidence

Where Right column, “Reviewer actions”.

What it is for Keeps weak or unsupported answers out of the Excel file.

A rejected answer. Its cell stays blank in the Excel file.

What you should see

The label says “Rejected, will not export” or “More evidence needed”.

1. Open a question whose evidence does not support the answer.
2. Press **Reject** to throw the suggestion away, or **Needs more evidence** if you need a better policy first.
3. You can still change your mind later and press Approve.

> Rejected and held answers are never downloaded.

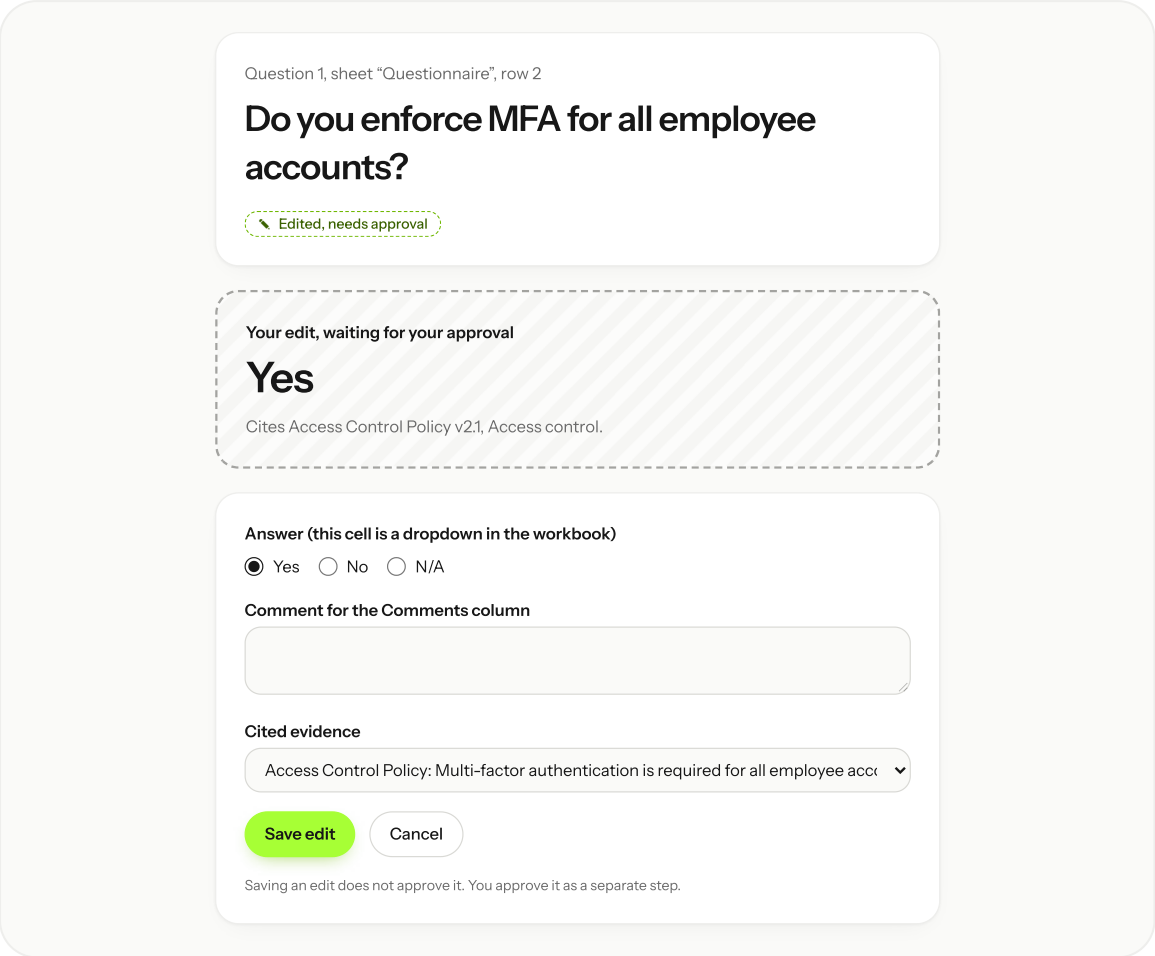

Open Questionnaire desk

https://questionnaire-desk.vercel.app/

Write your own answer

Where Right column: Reviewer actions → “Edit answer”.

What it is for Lets you answer a question the software missed, or fix a suggestion, and link it to a policy sentence.

The edit form. The Yes / No / N/A choice matches the dropdown in the Excel file.

1. Press **Edit answer**. Choose Yes, No or N/A. A comment is optional.
2. Under “Cited evidence” pick the policy sentence that supports your answer.
3. Press **Save edit**, then press **Approve**. Saving does not approve it.

What you should see

After you press “Save edit” the label reads “Edited, needs approval”, and the box is dashed again.

> Every edit cancels an earlier approval. If you cite nothing, the Excel file says “Source: none cited; answer entered by the reviewer.”

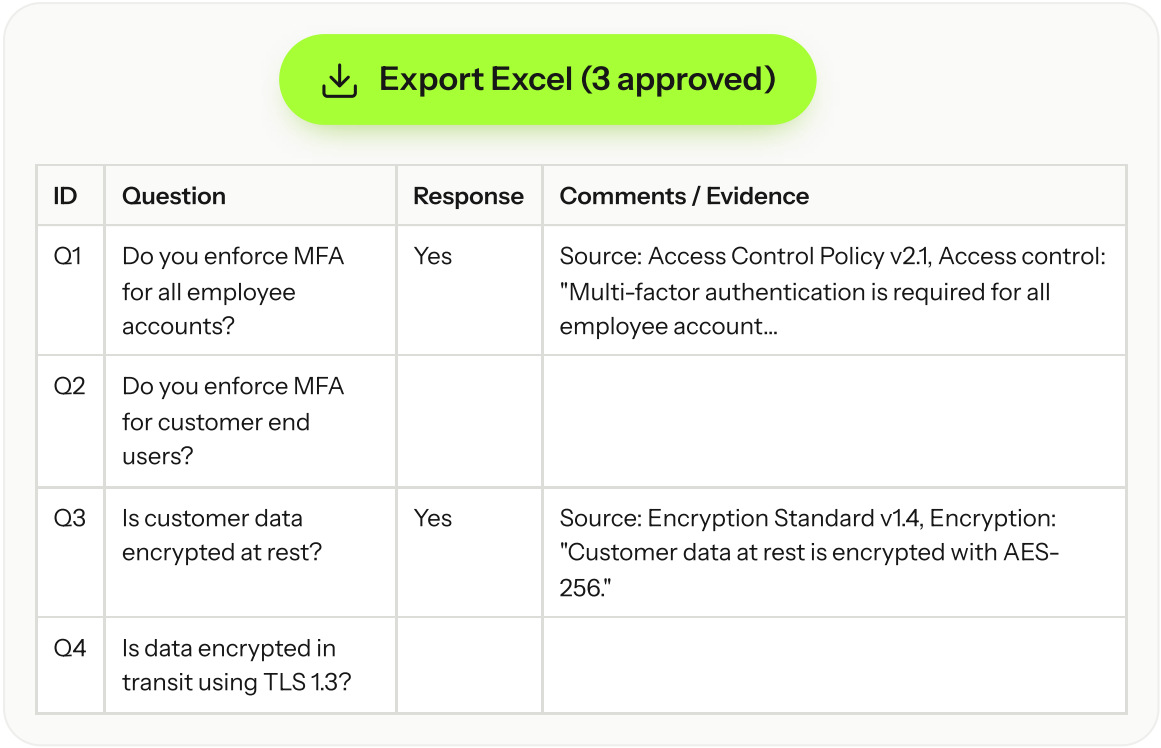

Open Questionnaire desk

https://questionnaire-desk.vercel.app/

Download the Excel file

Where Top right: “Export Excel (N approved)”.

What it is for Writes only your approved answers into a copy of the sample Excel file, keeping its formatting.

The button, and the first rows of a real downloaded file. Question 2 was not approved, so it is blank.

What you should see

A file called Northwind-Security-Questionnaire-reviewed.xlsx downloads. Approved rows have an answer and a “Source:” note.

1. Approve at least one answer. The button is greyed out while the count is 0.
2. Press **Export Excel (N approved)**. Your browser saves the file.
3. Open it in Excel and check the Response and Comments columns.

> Kept: sheet order, column widths, row heights, merged cells, dropdowns, colours and frozen panes (checked on the sample only). Not supported: images, charts and macros.

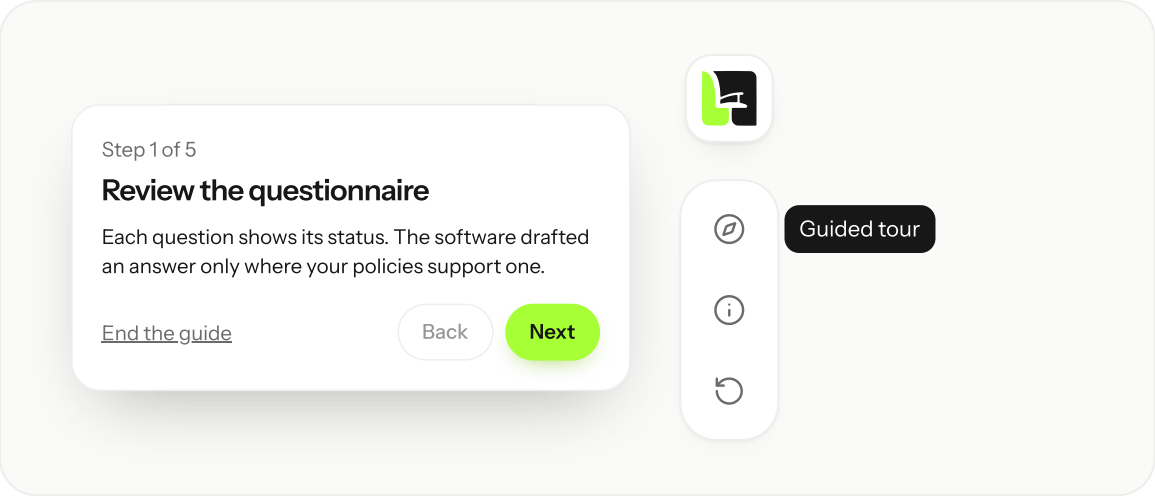

Open Questionnaire desk

https://questionnaire-desk.vercel.app/

Take the guided tour

Where Left sidebar, compass icon “Guided tour”.

What it is for A five-step walk through the screen that outlines each area for you.

Left: the tour card. Right: the sidebar icon and its label.

What you should see

A card “Review the questionnaire”, step 1 of 5, and the question list gets an outline.

1. Press the compass icon **Guided tour**. On a phone it is a button under the title.
2. Press **Next** and **Back** to move between the five steps.
3. Press **Finish** at the end, or **End the guide** (or Esc) at any time.

> From step 2 the tour opens Question 3 for you. It does not erase your choices.

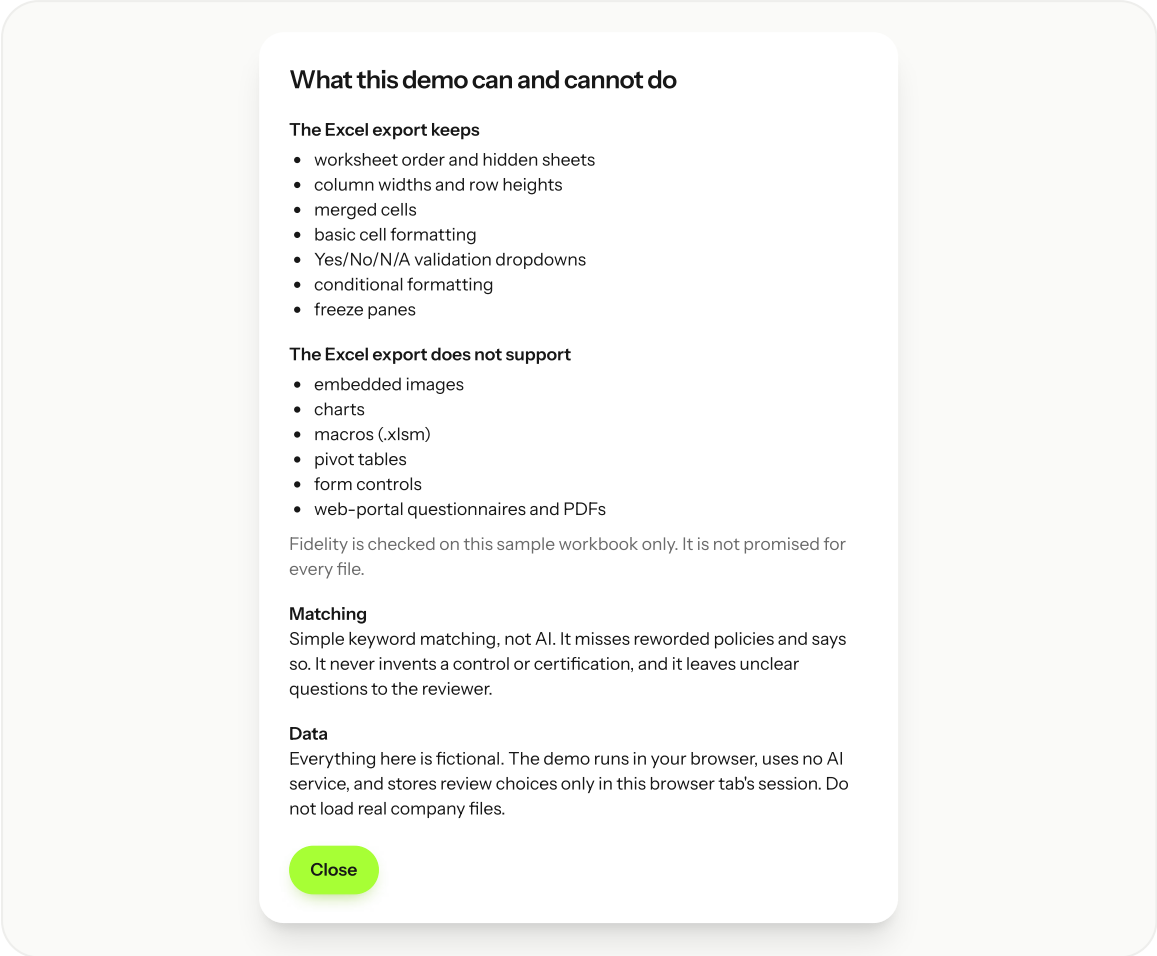

Open Questionnaire desk

https://questionnaire-desk.vercel.app/

Read the limits

Where Left sidebar, “i” icon “Limits”.

What it is for One place that lists what the Excel file keeps, what it cannot handle, and how matching works.

The Limits window.

1. Press the “i” icon **Limits**.
2. Read what the export keeps and what it does not support.
3. Press **Close**, press Esc, or click outside the window.

What you should see

A window titled “What this demo can and cannot do”.

> Fidelity was checked on this sample file only, not promised for every workbook.

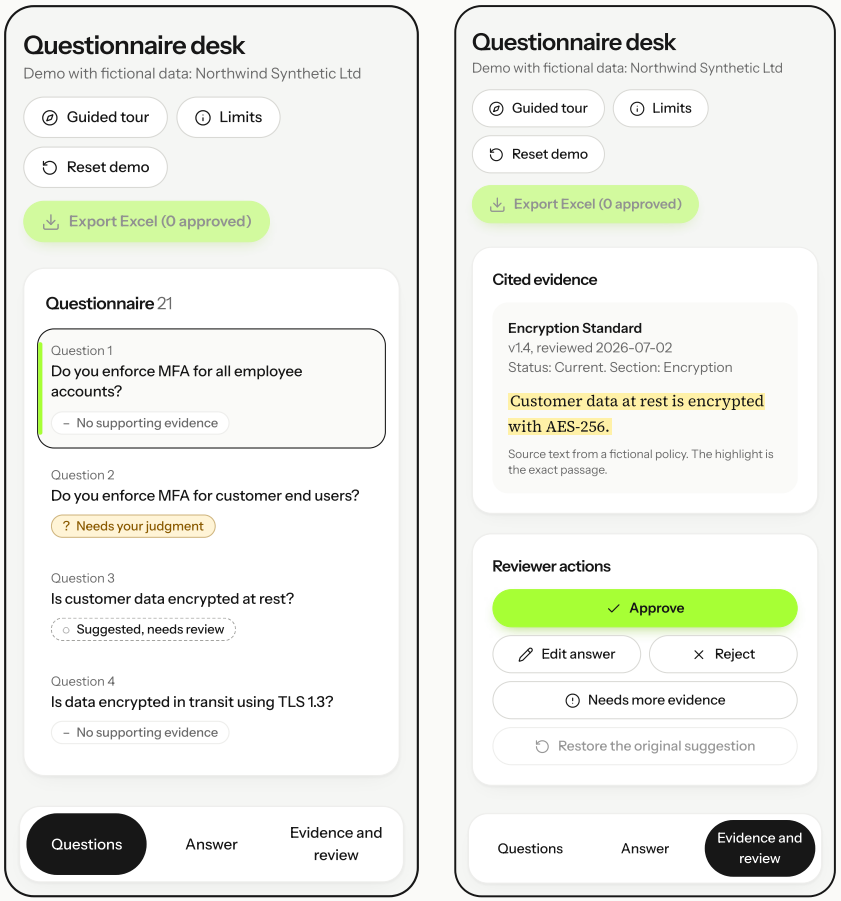

Open Questionnaire desk

https://questionnaire-desk.vercel.app/

Use it on a phone

Where Any screen narrower than a laptop.

What it is for The three columns become three tabs so everything stays readable.

Left: the question list. Right: after tapping Question 3 and the “Evidence and review” tab.

1. Tap a question. The app moves to the Answer tab.
2. Tap **Evidence and review** to see the evidence and the buttons.
3. Tap **Export Excel** at the top when you are done.

What you should see

Three tabs at the bottom: Questions, Answer, and Evidence and review.

> Tested in a phone-sized browser, not on real phones. The live site shows the app a little smaller than these pictures.

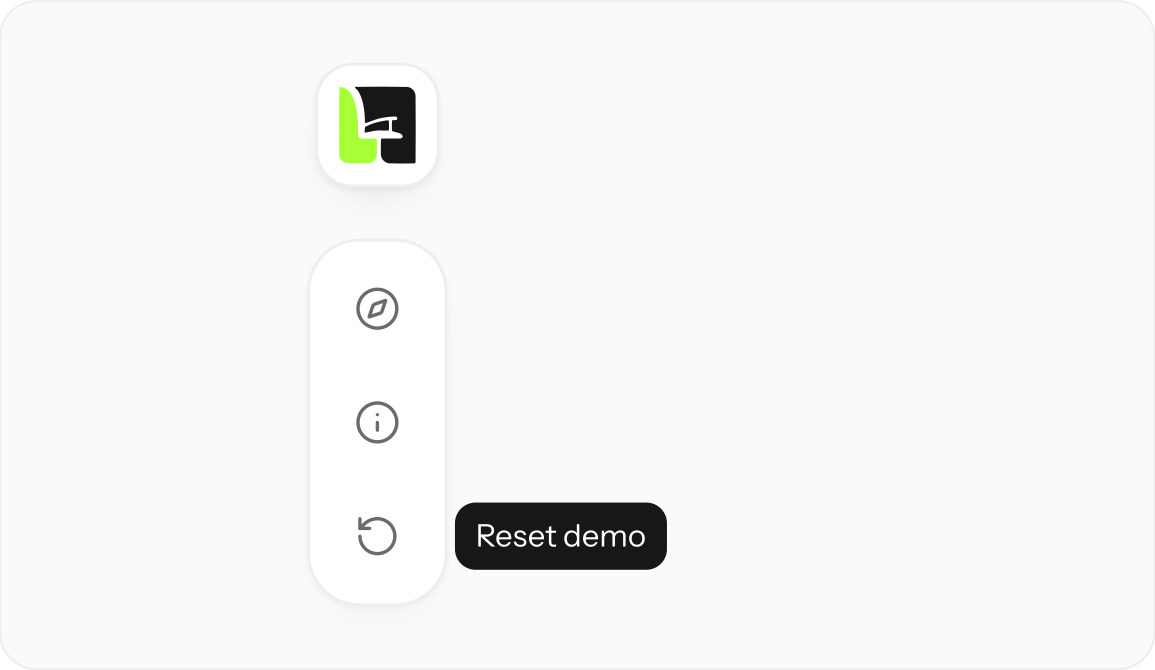

Open Questionnaire desk

https://questionnaire-desk.vercel.app/

Start over

Where Left sidebar, circular-arrow icon “Reset demo”.

What it is for Clears every approval, rejection, edit and hold so you can run the demo again.

The sidebar: Guided tour, Limits and Reset demo. A label shows when you point at an icon.

What you should see

A short message “Demo reset. All review choices were cleared.”, and Export Excel greys out again.

1. Press **Reset demo**.
2. Check that the count says 0 approved.
3. Your choices stay if you reload the page, but they are kept only in this browser tab, so closing the tab also clears them.

> Nothing is saved on a server and nothing is shared between tabs or devices.

Open Questionnaire desk

https://questionnaire-desk.vercel.app/

For developers: run it yourself

Where A terminal in the `secq-demo` folder.

What it is for Run the demo on your own computer, and check that it still behaves as described. These are commands, not screens.

```
npm install
npm run build
npm run serve          # opens http://localhost:3100

npm run test:unit      # matcher, review rules, export check
npm run test:e2e       # browser tests, desktop and phone
npm run data           # rebuild data from the Python prototype
```

The code is at github.com/itzrohithq-wq/Questionnaire-Desk. Pushing to its main branch redeploys the live site on Vercel.

What you should see

The terminal prints http://localhost:3100. The unit tests list 36 passing; the browser tests list 25 passing and 5 skipped on purpose.

1. Run `npm install` once, then `npm run build`.
2. Run `npm run serve` and open http://localhost:3100.
3. Run the tests whenever you change something.

> **Local upload switch:** set the build variable `NEXT_PUBLIC_ALLOW_UPLOAD=1` to show a file chooser for your own fictional .xlsx files. The live site never has it. Never load real customer files.

If something goes wrong

Find what you see in the first column, then follow the last column.

What you see	Likely reason	What to do
The link does not open	No internet, or a company filter blocks vercel.app.	Try another network or browser. Check the address is exactly https://questionnaire-desk.vercel.app/
“Start the interactive demo” shows an error	The sample file did not download.	Reload the page and try again.
Approve is greyed out	There is no answer yet.	Press “Edit answer”, choose Yes, No or N/A, save, then approve.
“Export Excel (0 approved)” is greyed out	Nothing is approved. Edited, rejected and held answers do not count.	Approve at least one answer.
An approved answer stopped counting	You edited it. Every edit cancels the approval.	Press Approve again after saving.
The Excel file says “none cited”	The approved answer has no policy sentence attached.	Edit the answer, choose a sentence under “Cited evidence”, save, approve.
My choices are gone	You pressed Reset demo or closed the tab.	Start again. Choices are kept only in that browser tab.
There is no sign-in or permission to fix	The demo has none. You may be thinking of a full product, which does not exist yet.	Nothing to set up.

Checklist and limits

Check these before you show the demo to someone else.

Before you show it

- ✓ https://questionnaire-desk.vercel.app/ opens and shows the welcome screen.
- ✓ You can approve, reject, edit and restore a question.
- ✓ A download with 2 approvals has exactly 2 answers.
- ✓ You told people it is keyword matching, not AI.
- ✓ No real company files are used.

What this guide covers

- Every control in the live demo, in the order you meet it.
- Starting, reviewing, downloading, the tour, the limits, phones and reset.
- Developer commands for running and testing it.

Not part of the demo

- Accounts, billing and real-file upload.
- An expert human review. That is a separate service idea, not this software.

Limits and what was checked

- In the sample, 5 of 21 questions get a suggestion.
- The Excel file was checked on the sample only; images, charts and macros are not supported.
- Tested in Chromium on a computer and in a phone-sized window, not on real phones or other browsers.
- Pictures in this guide are real screens of the live site, shown at 100% size.
- This is not a Tango export.
